

The National Single Window System (NSWS) is an online portal that will facilitate clearances at **Centre and State level on a single platform**. This will eliminate the need for investors to visit multiple IT platforms and offices to gather information and obtain clearances from different stakeholders. The NSWS will provide 'end to end' facilitation and support for investors including pre-investment advisory, information related to land banks. NSWS provides a single, unified interface to apply for various approvals available on the platform and aims to reduce duplication of effort involved in providing the same information to different authorities. NSWS facilitates users to access over 100 central level approvals and state level approvals with one user id and password.

**The State Single Window System i.e. TS-iPASS** covering all state approvals is now integrated with the NSWS. Once the user applies for required approvals in NSWS portal (<https://www.nsws.gov.in>) the respective Central approvals will go to the concerned Central Departmental Portal and State approvals will go to the TS-iPASS portal for further processing.

The NSWS will enable investors/entrepreneur/businesses to identify and obtain all clearances needed to start a new business operation in India through a single online portal. The NSWS will further help investors track status of their applications, respond to clarifications, and obtain the approvals through a single dashboard.

Begin your journey through Know Your Approvals (KYA) which helps generate a list of Central and State approvals that may be required to start your business operations in India. The intelligent Know Your Approval (KYA) is a user-friendly tool to help you identify central and state government approvals required. This service uses an intelligent questionnaire to capture information about your proposed business activities and identifies an indicative list of relevant approvals that may be required to set up your business in India. It may be noted that the list of approvals indicated by this module is based on user input and shall be used for guidance purpose only.

The applicant dashboard makes tracking and monitoring of approvals easy by providing a single consolidated view. The dashboard will enable users to check real-time status for the applied approvals.

NSWS provides secure online storage for your documents that can be attached to multiple applications to States and Central departments. This is accessible through your dashboard and certificates issued by respective authorities are automatically stored for ease of access.

Visit <https://www.nsws.gov.in> and apply for approvals.

❖ **ALL STATE APPROVALS UNDER PURVIEW OF TS-IPASS COVERED.**
