Major constituents of **Mineral Resources** are Granite of various colours accuring in the neighboring District Karimnagar abundantly as well as Rajanna Sircilla and there is a lot of scope to establish the granite Cutting and polishing units in Boinpally, Ellanthakunta and Vemulawada mandals.

viii. Cluster Development:

Sircilla is a major textile Zone having (30000) power looms in decentralized manner creating employment to the (14000) workers either directly or indirectly. There is Textile Park in the Sircilla with modern (1600) rapier looms providing employment to (2000) workers. Though the textile park is having strong base in terms of loomage and skilled workforce. It is not enjoying all the fruits of the modern textile sector. Due to lack of pre-loom facilities like Warping, Sizing, Dyeing and post-loom facilities like Cloth Dyeing, Processing etc. the power loom manufactures are producing intermediate product and selling it in the open market without any further value addition at least or no margins.

In this context, It is felt necessary to set up one Common Facility center under cluster development programme of government of India, Ministry of MSME. In the 15 acres vacant land in the park for creating Warping, Sizing, Dyeing, and Processing facilities. The services of CFC will also utilize by the Sircilla power-looms set up in-organized sector so as to create value addition for the products being made in the industry.
